

# PÖMA – Grader H225 ESP

For Tractors with three point hitch cat. II, 50 – 100 KW

With the PÖMA-Grader H225 ESP we complete our, over many years proven road-building-machines, with a cheap, professional deployable unit. New in this series is the sideways parallel motion of the device using a guide-bar. Thereby the subsequent support wheels always stay behind the Grader-shield.

The control of the 3 hydraulic functions - depth, tilt, side - happens via additional-valves and appropriate couplings of the tractor. The shield is turnable by 360° and can be adjusted with socket pins in 15° steps.

6 rippers and 2 sideblades are additional equipment.

<b>Specifications:</b>	Working width:	2250 mm
	Blade height:	480 mm
	Maximum offset, r.+l.:	900 mm
	Tilt of blade:	± 12°
	Total length:	3000 mm
	Weight:	about 860 kg
