

-Vibration-Roller RW 150

for tractors from 100–160 HP with three point linkage cat II or III

This is the unique machine for road building and maintenance and for landscaping. The high impact-force makes a very good job of compacting.

- directly driven over the hydraulic-system of the tractor
- high impact-force
- no vibration on the tractor because of rubber buffer
- for transportation just lift the threepoint-linkage
- it is not necessary to have a truck or trailer for transportation
- in offset-position it is possible to work safe close to ditches and walls
- to turn on small roads you just lift the machine
- piston for tilting enables to work on rounded roads

Specifications:

Working with	1.500 mm
Roller-diameter	1.000 mm
Maximum offset to left	800 mm
RPM	2.000–2.500/min
Frequency	33–42 Hz
Hydraulic-oil flow, max.	40 l/min
Impact force at 2.500/min	50 KN
Mounting	3-point hitch cat. II or III
Tilting	12°
Amplitude	0.8 mm
Workingspeed	0.5–2 km/h
